

Assignment 2: Introduction to Software Engineering

Imagine you are a software engineer in a software house and you are supposed to do the following in collaboration with the client.

1. Write meaningful title for your project.
2. Write system and user requirement for your selected project.
3. Write at least 7 functional and 5 non functional requirements of the projects selected by you.
4. Design a collective use case diagram for your selected project. Properly mention the use cases and actors, No need of tabular format.

NOTE: **It is an individual assignment** and marking will be relative, so if any group member helps any other group member, they will actually affect their own marks. Don't forget to write your roll number and name, section. Use case diagram to be made by hand using UML. Assignment to be submitted using soft and hard form. Due date March 30, 2023: 8:00 am.
